Camgen::width_scheme< model_t >

Camgen::R_scalar_gauge< model_t >

```
graph BT; A[Camgen::R_scalar_gauge< model_t >] --> B[Camgen::R_gauge< model_t >]; A --> C[Camgen::width_scheme< model_t >];
```

The diagram illustrates inheritance relationships between three classes. A central box at the bottom, 'Camgen::R_scalar_gauge< model_t >', has two arrows pointing upwards to two boxes above it: 'Camgen::R_gauge< model_t >' on the left and 'Camgen::width_scheme< model_t >' on the right. This indicates that 'Camgen::R_scalar_gauge' is a base class for both 'Camgen::R_gauge' and 'Camgen::width_scheme'.
